COMPANY OVERVIEW

About Us

Founded in 2007, **Ion Robinson India** is a leading provider of **industrial water** and **wastewater treatment solutions**. We specialize in design, fabrication, installation, and maintenance of treatment plants, ensuring sustainable and **cost-effective** water management. With **2500+** successful projects, we serve **industries, municipalities,** and **eco-conscious** partners globally. Our mission is to make water treatment affordable, efficient, and environmentally responsible, contributing to a cleaner and sustainable future.

Innovate. Conserve. Sustain.

OUR PROCESS

Mission

Our mission is to revolutionize wastewater and waste management by delivering **affordable, sustainable, and energy-efficient** solutions. We are dedicated to tackling the pressing challenges of population growth, industrial expansion, and climate change through cutting-edge technology, ensuring the conservation and responsible use of the world's most valuable resource — water.

Vision

We envision a future where **sustainable waste management** is the cornerstone of a cleaner, healthier, and more resilient world. By continuously innovating and optimizing our solutions, we aim to empower industries and communities with cost-effective, eco-friendly systems that drive environmental protection and long-term sustainability.

COMPANY VALUES

At Ion Robinson India, we are committed to **sustainability, innovation, and quality excellence**. Our **eco-friendly** solutions focus on **water conservation, waste reduction**, and technological advancements to enhance efficiency and performance. We uphold the highest standards to ensure **reliability, durability, and customer satisfaction**.

We prioritize a customer-centric approach, building long-term partnerships based on **integrity, trust, and transparency**. Through continuous growth and adaptability, we stay ahead in the evolving **waste management industry**, driving responsible and innovative solutions for a cleaner, more **sustainable** future.

WHAT WE DO

Water & Wastewater Treatment Solutions – Design, fabrication, installation, and maintenance of RO, ETP, STP, and other treatment plants.

Automatic Bottling Plants & Water Solutions – Manufacturing RO, UF, Softening Plants, Filters, Waste Management Treatment Plants, Water Testing Labs, and Components.

Manufacturers of Activated Carbon – Producing high-quality activated carbon for water treatment and industrial applications.

Manufacturing & Supply – Production of water treatment chemicals, filtration media, resins and essential plant components.

BUSINESS OVERVIEW

Market Presence

With **2500+** successful projects, **Ion Robinson India** serves industries, municipalities, and eco-conscious partners across India and globally with customized water and wastewater treatment solutions.

Key Competencies & Expertise

We specialize in **turnkey execution**, customized solutions, and advanced wastewater treatment technologies, backed by an expert team ensuring **high-quality** and **cost-effective** solutions.

Competitive Advantage & Innovation

Our focus on **sustainability**, **innovation**, and efficiency helps industries reduce costs, optimize resources, and future-proof their waste management systems.

ABOUT THE MANAGING DIRECTOR

As the Managing Director of **Ion Robinson India**, **Ravi Shankar Singh** brings extensive expertise in wastewater management, sustainability, and technological innovation. With a vision to revolutionize water treatment solutions, he has led the company in delivering high-quality, cost-effective, and eco-friendly systems to industries and municipalities worldwide.

Ravi Shankar Singh envisions **Ion Robinson India** as a global leader in sustainable water management, continuously innovating to meet future challenges.
